

Part1-Assignment-2: Spring Hibernate

1. The program uses a databases named **hibernatedb** I created with MySql server(**User : root and password:**). We have four tables **book**, **author**, **author_book** and **category** . the schema is

2. I used the Maven command line to create my project:

```
mvn archetype:generate -DgroupId=edu.herve.spring.hibernate -SpringHibernate
```

```
-DarchetypeArtifactId=maven-archetype-quickstart -DinteractiveMode=false
```

3. I edited the **pom.xml** and I added the necessary dependencies.
4. I created the folder **main\resources** manually .
5. I created the folder **main\resources\META-INF\sql** where I put my **shema.sql** corresponding to my database shema and **test-data.sql** to insert some data; the data are

```
mysql> select * from book;
```

ID	CATEGORY_ID	ISBN	TITLE	PRICE
1	1	1457896545	Beegining Java	61
2	1	5485632322	Java Entreprise Edit	70
3	2	5765522262	Mysql Concepts	46
4	2	7523232223	Beegining Mysql	49
5	1	4875656565	Java for non program	86
6	1	457565656	Advanced Java Concep	66

```
6 rows in set (0.00 sec)
```

```
mysql> select * from category;
```

ID	NAME
1	Java
2	Mysql

```
2 rows in set (0.00 sec)
```

```
mysql> select * from author;
```

ID	FIRST_NAME	LAST_NAME	DESCRIPTION
1	John	Smith	very young and popular author
2	Daniel	Perkins	new and revolutionary author
3	Jet	Li	From China and very well established in the authors list
4	Marcus	Wall	specialized in Mysql and brought a huge plus to this community

```
4 rows in set (0.00 sec)
```

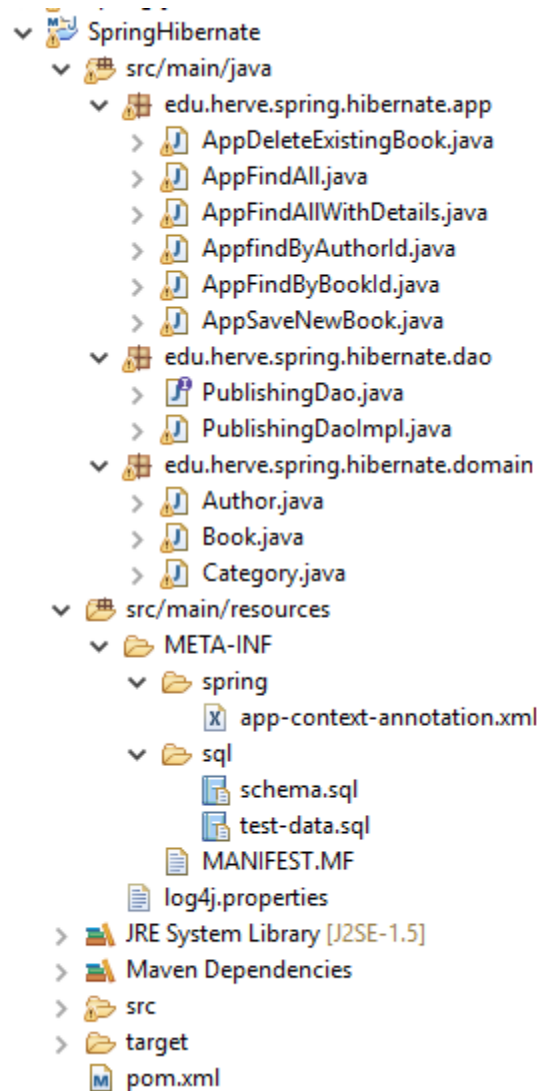

```
mysql> select * from author_book;
```

AUTHOR_ID	BOOK_ID
1	1
1	2
1	7
2	1
2	2
2	7
3	1
3	2
3	3
3	5
3	6
4	2
4	3
4	4
4	5
4	6
4	7

```
17 rows in set (0.00 sec)
```

6. I created the folder `main\resources\META-INF\spring` where I put my `app-context.xml.xml`
7. I imported my project into Eclipse IDE and I created the packages:
 - `edu.herve.spring.jdbc.domain` containing the classes **Book.java**, **Author.java** and **Category.java** corresponding to the tree tables book, author and category on the database.
 - `edu.herve.spring.jdbc.dao` containing the interface **PublishingDao.java** where i created the methods corresponding to the functionalities of my program. The class **PublishingDao DaoImpl.java** implementing the interface **PublishingDao Dao.java**.
 - `edu.herve.spring.jdbc.app` Containing the classes executing each of the functionalities listed in the assignment.
 - **AppFindAll.java** : find all books without authors and categories
 - **AppFindAllWithDetails.java**: find all books with authors and categories.
 - **AppFindByBookId.java**: find a book with authors and category by book's ID
 - **AppfindByAuthorId.java**: Find all books for one author id who has more than one book in the database.
 - **AppSaveNewBook.java**: add and save in your database a new book.
 - **AppDeleteExistingBook.java**: delete the saved book from the database.

This is the image of the structure of my project in Eclipse

8. the building and the execution of my application has the following results.
- for the methods **findAll()**

```

Hibernate: select category0_.ID as ID1_3_0_, category0_.NAME as NAME2_3_0_ fr
*****
